### Digital Photos Animate a Face to Illustrate Aging

Researchers at the University of Washington have created a way to take hundreds or thousands of digital portraits and in seconds create an animation of the person's face. The tool can make a face appear to age over time, or make the person's expression gradually change.

### Mutation Causes Lack of Fingerprints

Fingerprints are crucial forensic identity markers, but people with a rare condition called adermatoglyphia have no fingerprints. Scientists at the Tel Aviv Sourasky Medical Center in Israel have identified the gene mutation that causes the disease.
